Obtain System Access Appropriate to Your Role

As HR and Payroll Professionals, you may need to obtain access to a variety of business applications based on your role and responsibilities. Work with your manager to identify which of the systems on this list you should have access to. To ensure your access is processed in a timely manner, your divisional contact should be involved prior to submitting any access requests. The first bullet provides information about how to obtain access to the application; some of the links will open a webpage or knowledgebase document that provides detailed information on how to obtain access. The second bullet is a direct link to the application (you may want to bookmark this on your ‘favorites’ in your internet browser). The third bullet provides an email or a link to information if you need assistance with the application. The fourth bullet gives information on available training.
